Projects

CpClock | *HTML, CSS, JavaScript, Chrome APIs*

June 2025 – Present

- **Developed** a lightweight **Chrome extension** to help users track time while solving problems on Codeforces, improving contest preparation and time management.
- Designed an intuitive popup UI with start, pause, and reset controls, allowing users to manage the timer independently of the Codeforces interface.
- Used **Chrome Storage API** to persist timer state across page reloads and ensure a smooth user experience.
- Configured **manifest v3** and modular script architecture to ensure performance, and future compatibility.

Weather-App | *HTML, CSS, JavaScript, RapidAPI*

Nov-2024 – Present

- Built a responsive web application to fetch and display real-time weather conditions for any location using **RapidAPI**'s weather services.
- Integrated search functionality to allow users to get weather details like temperature, humidity, and condition dynamically.
- Designed a clean and minimal UI for better readability across devices.
